### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 28-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Bentley et al.

There is disclosed in Bentley a brewing cartridge, comprising: a compartment 21; a plurality of inlet apertures 28 located around a periphery of the compartment and substantially surrounding the periphery, the apertures being in an outer member 27; a plurality of outlet apertures 30 centrally located on the cartridge in an inner member 31, 32, 33; and a discharge spout 37.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Fischer.

There is disclosed in Fischer a brewing cartridge 1, 2 having a compartment for containing a beverage ingredient 30, a plurality of inlet apertures 9, a plurality of centrally located outlet apertures.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bentley et al.

In regards to the number of inlet and outlet apertures, it would have been obvious to one skilled in the art to construct the cartridge with the claimed number of apertures, since it has been held that discovering an optimum value of a result effective variable (number of apertures determine coffee strength) involves only routine skill in the art.

In regards to the type of beverage ingredient within the cartridge and its viscosity, such is not a structural limitation and is therefor not given any patentable weight.

# Allowable Subject Matter

Claims 24-27 are allowed.

## Response to Arguments

Applicant's arguments filed 10 April 2006 have been fully considered but they are not persuasive. The added limitation that the inlet apertures "...substantially surround" the periphery of the compartment is met by the prior art.

The term "substantially" does not require the inlet apertures to completely surround the compartment. The location of the apertures, surrounding the compartment on three sides, is structure enough to meet the limitations of the claim.

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Application/Control Number: 10/763,534

Art Unit: 1761

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Reginald L. Alexander whose telephone number is 571-

272-1395. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
